

REPUBLIC OF BULGARIA
Deputy Minister of Education and Science

No. 09-74
25.03 2022 г.

TO WHOM IT MAY CONCERN

Subject: Appointment of Bulgarian Representative in the EuroQCI Initiative

DEAR SIRs,

Having in mind the vast potential of quantum technologies and the significance of establishing a secure quantum communication infrastructure (QCI) across the continent, Bulgaria recognizes the benefits of investing in the development of these technologies and to establish a competent national body in this highly strategic field. Bulgaria has already invested via the Bulgarian Operational Programme “Science and Education for Smart Growth” in the development of the Center of Competence “Quantum Communications, Intelligent Security Systems and Risk Management” (QUASAR) by the Institute of Robotics – Bulgarian Academy of Sciences.

The Bulgarian representative in the EuroQCI board – Associate Professor Lachezar GEORGIEV, Research Manager of QUASAR Center of Competence, submitted in 2021 to the EuroQCI Board the National QCI Plan of Bulgaria. In this regard, the Institute of Robotics – BAS via the Center of Competence QUASAR is already coordinating the Bulgarian project under DEP call “DIGITAL-2021-QCI-01-DEPLOY-NATIONAL – Deploying advanced national QCI systems and networks.”

25.3.2022 г.
